

03. GOD'S KINGDOM COLONISATION PROGRAMME. PART 1 INTRODUCTION.

Hebrews 11:1-3

11 Now faith is the substance of things hoped for, the evidence of things not seen. 2 For by it the elders obtained a good report. 3 through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear.

At the end of Last year I was wondering what the New Year (2016) would bring, and what direction our messages would take; as I mused to myself I thought it's a puzzle. Then over the next several days there was one word that was used continually, used by a great many people, both in ordinary conversations, on the Radio and even on TV, it was the word puzzle. I had a strong witness that the Lord was impressing upon me that every single event that ever happened, no matter whom it involved, no matter what the event was, and no matter where or when it happened, these events were all part of a very large and complicated but invisible jigsaw puzzle. As each and every person is born they all have a part in this puzzle; this puzzle is full of both good and bad things bringing both Joy and Sadness, and every event in history is recorded as a piece in this puzzle. The pieces of this puzzle are the events that occur in the natural realm, but the picture of this puzzle is in the Spiritual realm and each and every piece or part has an invisible thread that links the events and the picture together; when this puzzle is finished it will be a picture of The Final Kingdom of this world, The Kingdom of God.

The result of this was my first message this year was 'God's invisible jigsaw puzzle', which fitted the political climate at that time, and our messages continued down that line. All went well, and I had several messages in hand, but then they stopped, I got nothing; eventually I ran dry and those messages I had in hand were being preached so that soon I would have nothing to bring. I really sought the Lord then after my last one was preached the Lord spoke to me, 'Teach about My Kingdom'; I had to admit I had never really taught on the Kingdom of God in any depth before. Where do I start Lord I asked, He answered 'I called you 'Sure Foundation' for a reason? What you read in this series of teachings is what the Holy Spirit has shared with me.

Genesis 21:2

2 For Sarah conceived, and bare Abraham a son in his old age, at the appointed time of which God had spoken to him.

God has a specific plan to establish His Kingdom on earth, and He will accomplish it in His own time frame, which works in different ways at different times; this is why it is difficult to establish a biblical chronology. The overall time frame God has established works on a somewhat similar pattern to a football match; actual time and real time. The actual time for a football match is 45min play first half + 15 min half time + 45 min play second half =105mins. However if there has been stoppage for injury, foul play arguments etc, that time is added on; the real time could be as much as 115mins to 120mins. God has included a time out for what is known as the 70th week; this will not end until the fullness of the gentiles comes in.

Ecclesiastes 1:9

9 The thing that hath been, it is that which shall be; and that which is done is that which shall be done: and there is no new thing under the sun.

Although not immediately apparent the above verse in Genesis explains a different aspect of how God's time works because it works on three axes, and it is very important that we grasp what that means. 1) *Chronological Time*, Chronological Time means one minute, or one day or one year following another so that maturity, and aging occurs, but chronological time is not just a straight line it is a continuing reoccurring series of cyclic events until the final event takes place. This is how prophecy works. 2) *The process of time*. The process of time is the time it takes for both Natural and Spiritual Seed to mature and each kind of seed will produce their own special fruit. Prophecy is one spiritual fruit. 3) *The appointed time*. The appointed time is the time appointed by God for any fruit natural or spiritual to appear whatever that fruit may be.

When seed is planted in the natural we know when the harvest will be, with spiritual seed the time needed for the seed to bear fruit is entirely God's decision. Scripture also explains how both honest and evil men produce fruit after their own kind and it is noted by the Lord. Consequently, He will prosper the good and bring down the evil allowing a season for every kind of society to prosper according to the seed they sow.¹ Honest and truthful people will produce an honest and truthful society, but Evil men will produce an evil society, making each society responsible for their own seed. God will ensure that whatever seed is planted, will only bring forth after its own kind, but it will be subject to God's law of the harvest meaning the harvest will mature in His time frame, when He is ready to put that particular jigsaw piece in place.²

Mark 4:26-29

And he said, so is the kingdom of God, as if a man should cast seed into the ground; And should sleep, and rise night and day, and the seed should spring and grow up, he knoweth not how. For the earth bringeth forth fruit of herself; first the blade, then the ear, after that the full corn in the ear. But when the fruit is brought forth, immediately he putteth in the sickle, because the harvest is come.

Matthew 13:4-8

4 And when he sowed, some seeds fell by the way side, and the fowls came and devoured them up: 5 Some fell upon stony places, where they had not much earth: and forthwith they sprung up, because they had no deepness of earth: 6 And when the sun was up, they were scorched; and because they had no root, they withered away. 7 And some fell among thorns; and the thorns sprung up, and choked them: 8 But other fell into good ground, and brought forth fruit, some an hundredfold, some sixtyfold, some thirtyfold.

Matthew 7:24-27

Therefore whosoever heareth these sayings of mine, and doeth them, I will liken him unto a wise man, which built his house upon a rock: And the rain descended, and the floods came, and the winds blew, and beat upon that house; and it fell not: for it was founded upon a rock. And every one that heareth these sayings of mine, and doeth them not, shall be likened unto a foolish man, which built his house upon the sand: And the rain descended, and the floods came, and the winds blew, and beat upon that house; and it fell: and great was the fall of it.

Every seed that grows follows the pattern given in Matthew's Gospel, proving God's law of the harvest; natural seed always produces a natural harvest, spiritual seed always produces a spiritual harvest. However the harvest must follow God's law and 'The Law of the harvest' is: -

- One: All seed will produce fruit after its own kind.
- Two: The harvest is always in a later season than when the seed was planted.
- Three: The harvest is always greater than the seed that was sown.

This Law of the harvest is very important and we must not forget it because it will affect us later on, the purpose of the harvest is for a much greater quantity of fruit than the seed planted. There is one thing about a natural harvest that is different to a spiritual harvest, and that is the time between the planting and the actual harvest itself. When seed is planted in the natural we know when the harvest will be, with spiritual seed the time needed for the seed to bear fruit is entirely God's decision. Genesis 3:15 is the first promise of the Mashiah, and the fact that He will die. Yet He only appears just before the times of the Gospels, which is why Paul said when the fullness of the time came, God sent forth His Son, born of a woman, born under the Law.³ God organised that time so His Son could also die at the right time as again Paul said, while we were still helpless, at the right time Christ died for the ungodly.⁴ In other words the birth of Jesus, and the time He died on the cross was determined by God; there is a time and a season for everything.⁵ However, we should also know that just as buildings need good foundations to stand against physical storms; because Satan's purpose is to usurp God's power and authority.

¹ Matthew 13:4-8 Seed along the wayside, seed among the rocks, seed among the thorns and seed in good ground.

² 1 Samuel 2:7 + Psalm 75:7

³ Galatians 4:4

⁴ Romans 5:6

⁵ Ecclesiastes 3:1

We who are God's disciples need good spiritual foundations to stand against the spiritual storms Satan will bring against us.⁶ This is exactly what Jesus is talking about in the above scripture in Matthew 7, dealing with the kind of foundations on which we build the Temple of God, which we are.⁷

Genesis 1:27

27 So God created man in his own image, in the image of God created he him; male and female created he them.

Psalm 8:1-9

1 O Lord, our Lord, how excellent is thy name in all the earth! Who hast set thy glory above the heavens? 2 Out of the mouth of babes and sucklings hast thou ordained strength because of thine enemies, that thou mightest still the enemy and the avenger. 3 When I consider thy heavens, the work of thy fingers, the moon and the stars, which thou hast ordained; 4 What is man, that thou art mindful of him? and the son of man, that thou visitest him? 5 For thou hast made him a little lower than the angels, and hast crowned him with glory and honour. 6 Thou madest him to have dominion over the works of thy hands; thou hast put all things under his feet: 7 All sheep and oxen, yea, and the beasts of the field; 8 The fowl of the air, and the fish of the sea, and whatsoever passeth through the paths of the seas. 9 O Lord our Lord, how excellent is thy name in all the earth!

The first three verses of the Bible explain how God gave birth and life to the Earth and the whole of the cosmos⁸ then plants grass and trees, animals, birds, creeping things and finally, Adam and then Eve God's crowning glory.⁹ God created man in His own image, not just Adam and Eve, there is a much wider implication than that; it also means all those who will be the seed of Adam. Why Psalm 8, because Psalm 8, is about man and God and it is linked to Genesis 1:27. Psalm 8 is not long but when David wrote it he raised a very interesting question in verse 4, 'What is Man'? We would perhaps have expected the question to be who is Man, yet it is what; when *what* is answered '*What*' always allows quality to be added to something or someone, when you ask the question what are you, you are a Father, a Brother, a Christian, a Buddhist, an Engineer, a plumber; what is used for a person's gender, occupation or profession, religion, nationality, ethnicity, political affiliation, personality, character, and social role I am sure you get the idea. 'Who' on the other hand is always personal it adds identity to someone, for instance a name, Joyce, David, or a relationship, like cousin, mother in Law, your position or station in life, like Mr & Mrs, Duke, or Lord Mayor. Just before asking that question David was contemplating the heavens, the moon and the hundreds of stars he could see; possibly thinking to himself, how magnificent they were, how majestic they looked. In comparison to the enormity of the heavens man seemed a little insignificant yet God, the God who was powerful enough to create this magnificent array took the time to look after David and talk to him, why? This is what leads David to ask this question, 'what is man that you are mindful of him'?

Dan 12: 4

4 But thou, O Daniel, shut up the words, and seal the book, even to the time of the end: many shall run to and fro, and knowledge shall be increased.

2 Timothy 2:15

15 Study to shew thyself approved unto God, a workman that needeth not to be ashamed, rightly dividing the word of truth.

The theologians of Wycliffe's and Tyndale's time had some knowledge of the Bible but it was not studied in depth or detail by very many who called themselves theologians, nor were they keeping their eye on the growth of knowledge that Daniel foresaw.¹⁰ The early church had what they termed a fear of heretics spreading teachings and opinions that contradicted their personal interpretation of the Bible. They persecuted scientists who, through scientific study formed theories about the universe.

⁶ See paper on Kingdom Foundations.

⁷ 1 Corinthians 3:16-17

⁸ For a full description of the birth of the Earth see 'The Bread and The Wine by Bryen Gaskell ISBN 978-1 908128-62-1

⁹ Ibid, for how Adam and Eve, were created.

¹⁰ Daniel 12:4

The Church Leaders deemed such findings heretical and likely to reveal the truth about what they had done and were continuing to do with God's word, so they forbade people from reading not just the Bible but many books on scientific subjects, by placing the books on the Index of Prohibited Books. Two of the most famous scientists whose work the Church banned were Nicolaus Copernicus AD1473, to AD 1543, and Galileo Galilei AD 1564, to AD 1642.

2 Timothy 3: 2-5

1 For men shall be lovers of their own selves, covetous, boasters, proud, blasphemers, disobedient to parents, unthankful, unholy, 3 Without natural affection, trucebreakers, false accusers, incontinent, fierce, despisers of those that are good, 4 Traitors, heady, high-minded, lovers of pleasures more than lovers of God; 5 Having a form of godliness, but denying the power thereof: from such turn away.

There were three inventions that just about knocked the early theologian off his pedestal of suppressed knowledge that had allowed them to take total control; the Church authorities suppressed a great deal of knowledge related to Scripture as well as science. They did this for two reasons, one their desire to maintain absolute control of both the ordinary people and the countries Government; two they wanted total segregation from the Jew and the way he studied the word of God. The first of the inventions that caused a problem was the Gutenberg Printing Press, invented in AD 1440; some thirty-three years before Copernicus was born. As good as the printing press was it had an inherent problem; it caused bible students to start reading the Bible linearly instead of studying it. The second invention was the Microscope invented in 1590, twenty-six years after Galileo was born, this device allowed the general public as well as scientists to look at a drop of pond water and see things they never new existed. Furthermore because of the action of the Church fathers in suppressing knowledge of scientific facts in the past the scientist was in opposition to the church. The third invention was the Telescope invented in 1608 this device did to the heavens what the Microscope did to a drop of pond water. Science had suddenly exploded and the Church leaders were short on Biblical knowledge, but big on deceit and deception; these leaders of the Church were lovers of themselves, lovers of money, boastful, arrogant, abusive, disobedient to God, ungrateful, unholy, unloving, unforgiving, slanderous, without self-control, brutal, without the love of good, they were traitorous, reckless, conceited, lovers of pleasure rather than lovers of God, having a form of godliness but denying its power. From such as these came things like the Spanish Inquisition, imprisonment, and burnings at the stake.

Caught on the back foot so to speak, the Church leaders could not answer the question why had God created these previously unseen and incredibly small unknown things, and how could there be so many stars. So, a type of war between science and religion broke out, and over the years there would be more casualties on both sides of the argument, which still exists today.

Acts 8:26-31

26 And the angel of the Lord spake unto Philip, saying, Arise, and go toward the south unto the way that goeth down from Jerusalem unto Gaza, which is desert. 27 And he arose and went: and, behold, a man of Ethiopia, an eunuch of great authority under Candace queen of the Ethiopians, who had the charge of all her treasure, and had come to Jerusalem for to worship, 28 Was returning, and sitting in his chariot read Esaias the prophet. 29 Then the Spirit said unto Philip, Go near, and join thyself to this chariot. 30 And Philip ran thither to him, and heard him read the prophet Esaias, and said, Understandest thou what thou readest? 31 And he said How can I, except some man should guide me? And he desired Philip that he would come up and sit with him.

2 Timothy 3:14-17

14 But continue thou in the things which thou hast learned and hast been assured of, knowing of whom thou hast learned them; 15 And that from a child thou hast known the holy scriptures, which are able to make thee wise unto salvation through faith which is in Christ Jesus. 16 All scripture is given by inspiration of God, and is profitable for doctrine, for reproof, for correction, for instruction in righteousness: 17 That the man of God may be perfect thoroughly furnished unto all good works.

Modern literature is not written the same way as ancient literature, and this presents a problem for modern day Bible students.

Ancient thought is associational, not scientific, and therefore tends to create the maximum relationship between experience, language, and art, not the minimum which is so characteristic of modern over-specialisation style of writing. Before the Gutenberg press was invented, there were only a few books and even fewer authors. The few men who wrote books wrote them extremely carefully; this was the same with all ancient writings including the Bible.

These books were written very precisely, with extreme care and every word had its place, a fact that is generally ignored by Bible readers today. In this modern era there are plenty of books that set out the Christian view of philosophy, history, art, science, man and so on; all of which use a vocabulary that depends on the socioeconomic background of the modern authors. There is however, a real need for books and teachings that digs deep into the Bible to understand the vocabulary of the Bible and see what the Bible's own worldview is. It is an area that is much neglected; the Bible must be understood so it can be explained in the Bible's own language, using the Bible's own vocabulary; ensuring that no matter what socioeconomic background you are from you understand Bible perfectly.

The Biblical worldview will not be learnt, or understood by reading first one subject then another; neither will the use of analytical language of philosophy and science help. The Bible is a Semitic book, written by a Semitic people, for Semitic people, and about Semitic people; this means we need to understand the Bible from the point of view of the many scribes God used to write it. To fully understand what the Bible is saying it must be read from a Hebraic perspective. The Hebrew of the Bible was not a scientific language, and it was written and spoken by a people with little or no understanding of science and no medical knowledge. However, both God and the writer expected the readers to study the word of God so that they may fully understand what was written. We have to understand the rich and compact language of symbolism and poetry, and the word pictures it paints; the purpose of the rituals that take place and the architectural images unearthed over the years. We must understand the numerical structures of ancient Hebrew and the geographical locations of places; the types of trees, what they represent, and how this ancient people understood the stars. In short, the Bible was written and handed down to us in a pre-modern package that seems very strange to a modern day reader; the translators tried to help, but hampered by the Church Fathers desire to suppress scripture and the translators lack of understanding and knowledge of scripture, the result was many translators muddied the waters.

Psalm 119:33-35

³³ Teach me, O LORD, the way of thy statutes; and I shall keep it unto the end. ³⁴ Give me understanding, and I shall keep thy law; yea, I shall observe it with my whole heart ³⁵ Make me to go in the path of thy commandments; for therein do I delight.

Romans 1:20

20 For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse:

The ancient Greeks believed that there were four elements that everything was made up of: earth, water, air, and fire. This theory was suggested around 450 BC, and it was later supported and added to by Aristotle. Aristotle also suggested that there was a fifth element, which he called *aether*, because it seemed strange to him that the stars would be made out of earthly elements. He would be surprised to learn that they are in fact made up of many elements found on earth, ¹¹ which is important and we will come back to it; also the stars are so hot they could be said to be on fire all the time. The idea that these four elements of earth, water, air, and fire that supposedly made up all matter was the cornerstone of philosophy, science, and medicine for two thousand years, to approximately AD 1550.

Hebrew poetry is written much differently than our own Western style of poetry, almost all within the Ekklesia do not recognise the poetry of the Bible, this lack of understanding often causes problems when translating or interpreting passages written in poetic form. Approximately 75% of the Hebrew Bible is poetry.

¹¹ <http://www.hometrainingtools.com/a/fourelements>

The book of Genesis is filled with poetry, all of Psalms and Proverbs are Hebrew poetry and many other books. ¹² While modern science is certainly more accurate than their ancient Greek forefathers; nevertheless nothing in Genesis 1 contradicts science and its observations on creation, when Genesis 1 is understood. Romans 1:20 tells us that God's invisible attributes are "clearly seen, by looking at and understanding the whole of creation. In other words, creation reflects the character of its Creator, and points everyone to God Himself. It is like listening to your favourite music, if that happens to Elgar the English composer whenever you hear his music played it points you immediately to Elgar; in the same way the whole of creation carries the stamp of God.

John 5:39

39 Search the scriptures; for in them ye think ye have eternal life: and they are they which testify of me.

Romans 1:20

20 For the invisible things of him from the creation of the world are clearly seen, being understood by the things that are made, even his eternal power and Godhead; so that they are without excuse:

The Bible identifies that everything in creation bears some analogy to God, the whole world and everything in it or on it has been made with God's stamp on it just to reveal Him. If we would but read Scripture we will find analogies to God in every area of His creation: inanimate objects like God the rock of Israel, Christ the door of the sheep, the Spirit of God is wind, breath, and fire. The same applies to plant life, God's strength is like the Cedars of Lebanon, Christ is the bread of life, then the animal kingdom Christ is the Lion of Judah, the lamb of God, He is compared to an Eagle, and a hen; finally Mankind, God is a king, a landowner, a lover; Christ as the prophet, priest, and King, He is a servant, a Son, and a friend. Even when it comes to abstract things that have no actual physical existence, God is spirit, God is love, God is light; Christ is the word, the way, the truth, and the life, He is wisdom, He is righteousness, He is sanctification, He is redemption. He is the morning star, He is the light of the world, He is a torch, a fire, the fountain of living waters, He is healing ointment, He is our hiding place, a safe strong tower, a place of refuge, He is a shadow to abide under, a shield, He is a Temple, and He is GOD. Even wicked people in high places can unknowingly reveal the presence of God; we just need to read Luke 18:1-8 about the unjust Judge to see that.

1 Corinthians 12:12

12 For as the body is one, and hath many members, and all the members of that one body, being many, are one body: so also is Christ.

Genesis 1:27

27 So God created man in his own image, in the image of God created he him; male and female created he them.

Hebrews 10:5

5 Wherefore when he cometh into the world, he saith, Sacrifice and offering thou wouldst not, but a body hast thou prepared me:

Whereas the universe is God's creation, it follows that it also reveals and manifests God Himself. There is not one atom of the universe in which his divinity does not shine forth. Secondly, Scripture teaches us that man has an altogether peculiar position among all of God's creation. Whereas creatures in general exhibit vestiges of God's virtues, man on the contrary, is the very image and likeness of God. When God made man in His image He did it for one specific purpose, that there would be a body of people on Earth who would be part of His Family, placed on Earth to worship Him as God so that His Kingdom will come on Earth as it is in Heaven. However, when we look at what the word teaches us about Man being made in God's image one of the things we really need to grasp the importance of is God's body here on Earth, which is quite separate from the fact that Christ assumed a real human body.

¹² <http://www.ancient-hebrew.org/language.html>

In Genesis 1:26-27 God declares man will be made in His image, Scripture identifies how man is made in His image and shows that Man is an analogy of God. God has feelings He both loves and hates; God has a Spirit, Gen1:2 and God has a soul, Lev 26:11. All those terms that describe the body of man are applied to God. Scripture says God has a face in Exodus 33:20, He has eyes and ears in 1Peter 3:12, God has eyelids; Psalm 11:4, Jacob was the apple of God's eye, Deuteronomy 32:10. God has ears, Psalm 55:1, a nose, Deuteronomy 33:10, a mouth, Deuteronomy 8:3, lips, Job 11:5. God has a tongue, Isaiah 30:27, a neck Jerem 18:17, and a back Exd 33:23, He has arms, Exodus 15:16; God has hands and arms, Psalm 89:13, His hands have fingers, Psalm 8:3, God has a heart, Genesis 6:6. God places one hand in His bosom, Psalm 74:11; God has feet, Isaiah 66:1.

Furthermore God has every human emotion: joy / rejoicing, Isaiah 65:19, grief, Psalm 78:40, anger, Jeremiah 7:18, fear, Deuteronomy 32:27; love and hate Rom 9:13, Jealousy Deuteronomy 32:21; wrath and displeasure, Psalm 2:5; vengeance, Deuteronomy 32:35. There is much more but it is clear from all that we have seen that each human being is a symbol of God. The faculties of the human person reveal aspects of God and portray Him in the world. But not only is each individual an image or symbol of God the same is true of groups of men and women. God created man in His own image, in the image of God He created him male and female He created them, notice this scripture implies more than one. For this reason, there is a relationship between the individual human person, and a congregation of human people for they who acknowledge God make up the Body of Christ, / God; that is why God says a body you have prepared for me. That body is called the Body of Christ and it is a congregation. This special Body called the Ekklesia is the Ekklesia that have been chosen by God to form the Body of Christ. What is man that God is mindful of him, Man is what the Body of Christ is made up from.

Math 25:34

34 Then shall the King say unto them on his right hand, Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world:

1 John 4:16

¹⁶ And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love dwelleth in God and God in him

It had always been God's intention to build a nation of Holy People who would worship Him; after what might be classed as an internal meeting of the Godhead the decision is made and the Bible becomes the minutes of that meeting. This means when God began His Kingdom expansion programme He already knew exactly what He was going to do; everything He did had already been done and God began the beginning of His expansion programme. ¹³ God's whole programme would be based on love and God's love is always rooted in Justice, Righteousness, Mercy and Discipline.

The word 'God' is not really a name or a pronoun, the word God is more accurately a title of the one Supreme Being, the King of Heaven and Earth, and the creator and ruler of the whole cosmos. However, the first thing we need to understand is, before anything was GOD is. God dwells in a realm called Eternity, ¹⁴ and He decided to enlarge His Kingdom; based on this decision God needed to establish the conditions He needed in order to create this expansion. In John 8:12 Jesus says 'I am the light of the world', in John 9:5 Jesus says again 'I am the light of the world' and 1John 5:9 it says 'God is light'; if then God is light and the Genesis events are starting in darkness, God had to first create that darkness in order to start. Isaiah 45:7 confirms that fact, God creates darkness. Also, the very first word in scripture actually confirms this too: the first verse in the Bible starts off saying; '*In the beginning*' that word beginning is not a good translation. The Hebrew word *B'rēshiyth* is the word translated as 'In the beginning,' means: - At first, in that instant in time or space, the first part of a series of events starts. But, 'In the beginning' does not mean the very first thing God did, the first thing God does before creation begins is, He cloaks Himself in darkness.

¹³ Isaiah 46:9-10

¹⁴ Isaiah 57:15

At their meeting in Eternity, 'God The Father—'God Son' and God The Holy Spirit, in other words the Godhead itself; they decide that the Kingdom of God should be expanded. God cloaks Himself in darkness in readiness for the expansion to start. The start of God's expansion programme to colonise planet Earth starts with the birth of that Earth followed by creation; we the reader are present at the birth of this planet Earth followed by what takes place as God begins His creation process. The whole of creation takes place after what led up to the decision to enlarge the Kingdom of God took place; indicating that the start of process of creation had to be in darkness and it is only after the actual cloaking that the reader is allowed on the scene.

The Hebrew of Genesis 1:1-3 explains the process of how God gives birth to the cosmos,¹⁵ once that part of God's creation programme is complete God divides the waters, part remains in the heavens and the other part on the face of the Earth. Then God causes plants, herbs, grass, and trees of all kinds to come forth from the ground. Next God creates the Sun and the Moon, and the stars to light the world and divide the light from the dark.

It should be noted here that the whole of the cosmos was birthed and given light, that includes the Sun, the Moon, the planets and the of course the Stars. The Sun will not be seen as yet but remains cloaked. The first time we see light is in verse 3, *God saw the light, and that the light was good, so God divided the light from the darkness, God called the light Day, and the darkness he called Night; and so the evening and the morning were the first day.* In the Hebrew, the word used for light here is 'owr; it means Luminescence, and although there is light there is no source given for that light, and it is not the Sun. In fact this light occurs a second time in Revelation 21 where John says: - *But I saw no temple in the city, because the Lord God Almighty and the Lamb are its temple. And the city has no need for sun or moon to shine on it, because the glory of God illuminates the city, and the Lamb is its lamp.* It is only in Genesis 1, verse 14 that God said: - *'Let there be lights in the firmament of the heaven to divide the day from the night; and let them be for signs, and for seasons, and for days, and years: so God made two great lights; the greater light to rule the day, and the lesser light to rule the night: he made the stars also'.* The Sun, The Moon, and The Stars were given for light and to measure time by. When we read Genesis 1:14 it almost sounds like God made the stars as an after thought, but that is not so. The word for light here is 'ma'owr' it means light that originates from a source, like the Sun, Moon, Stars, or even a candlestick. It is because God removes His cloaking in stages; the Sun, Moon, Stars appear, so although they are already created they are only revealed at a later time.

Then, God created fish of every kind large and small, squids, octopuses, sea snakes, and even the sea coral: then the birds and fowls that fly above the earth, birds of every conceivable kind. Next God created whales, dragons, the plesiosaurus and a whole range of dinosaurs, and sea monsters. This is followed by living creatures, cattle, creeping things, like crabs and all manner of organisms, and beast of the earth.

God's creation process continues as He makes the beasts of the earth, and every thing that creepeth upon the earth which includes everything from unseen bacteria to flies, insects of all kinds' right up to snakes, alligators, lizards and crocodiles. Finally God makes Adam and from Adam God draws out Eve.¹⁶ The earth was now ready as God's Kingdom expansion programme was well under way. The creation of the cosmos is the beginning of God's Kingdom development plan, so that everything God creates will have a purpose. Where the purpose of something is not known abuse is inevitable, consequently this world has been abused, and will continue to be abused until Jesus Christ returns. Every event in history no matter how large or small, no matter where it takes place will be used to serve the purposes of God. The whole cosmos, especially this planet earth, as well as every other planet including those yet to be discovered; they are part of God's Kingdom expansion programme. The whole of the cosmos has been created for one purpose; to hold in place this Earth and to provide a suitable habitation for the human race that would populate Earth. That is all well and good, but to say the whole of the cosmos was created to hold this planet Earth in is a very sweeping statement. How can we even begin to know or prove the truth of that statement? Through something called the Anthropic Principal.

The Anthropic Principal

In 1959, two Physicists published an article in a British magazine called “*Nature*” the article had an intriguing title, “searching for interstellar communications.”¹⁷ It became known as the ozma project, (named after Frank Baum’s Queen Ozma in the wizard of oz). An 85ft radio telescope at US Nautical Observatory, Green Bank, West Virginia was aimed at two stars, *Epsilon-Eridani & Tau-Ceti*. They are about eleven light years away from earth. The project ran for six hours a day between April & July 1960. It was totally unsuccessful. A second project, ‘Ozma II’ was carried out at the same observatory scanning six-hundred-and-fifty stars about the same distance from earth as the first two stars. The project ran from 1973 to 1976 and it too, was totally unsuccessful.

In 1971 before project ozma II started eighty-four of the worlds top scientists gathered for a conference on “Communication with Extra Terrestrial Intelligence,” the scientists nicknamed it Ceti, with a ‘C’. The worlds leading scientists in, astrophysics, engineering, doctors, neurophysiologists, sociologists, psychologists and many others besides, attended. The conference covered every possible contingency, far beyond the intellectual capacity of most people. While the conference was stimulating, it finally closed with the unsatisfactory conclusion that Planet Earth remains a unique event, more of a miracle than statistical.

Regardless of the findings of the conference, and totally ignoring the Anthropic Principal the search for intelligent life continued with a new title SETI, this time spelt with an ‘S’. The “search for extraterrestrial intelligent life” using sophisticated radio telescopes, the project gained much public interest and many films have been made about this subject, including one called Contact by Carl Sagan, before he died. (This by the way was pure fiction). This new investigation was enormous and by the end of 1985 more than 60 trillion channels had been scanned. During this time 37 events of interest were found but further investigations revealed the electromagnetic signals were not repeated nor were they ever identified.¹⁸

As interesting and exciting as it sounds, for a project like SETI to succeed, any radio signal that was sent by any intelligent being 400 light years away from earth would have been sent before earth had the technology to receive those radio signals. This means whatever intelligence that far away wanting to communicate with earth would need a different method of communication than radio and / or, would need to know the future, which automatically means radio waves would not be the communication medium. Finally, in April 2011 SETI closed down, totally unsuccessful in locating any other intelligent beings, but those on the project remained hopeful. SETI, the Search for Extra-Terrestrial Intelligence, has resumed operations at its Allen Telescope Array in California. The search was suspended in April 2011 due to lack of funds, but now contributions from members of the public and investment by the US Air Force allowed the research to continue starting in, December 7, 2011. Regardless of all this, what could not be ignored was the discovery of a delicate balance between an almost innumerable number of factors, holding the cosmos together. This balance is so delicate that life can only exist on planet earth, and nowhere else in the known cosmos, it was called “The Anthropic Principle.”

What is the Anthropic Principle and does it affect life on earth? Anthropic means, relating to human beings or their existence, or pertaining to man, and it comes from the Greek Anthropikos meaning human, or Anthropos, meaning male human being, or mankind. Principle means the law that concerns natural phenomenon or the behaviour of a system like our solar system. The Anthropic Principle then is the Law of Human Existence. It is well known in scientific circles that our existence in this universe depends on numerous cosmological constants and parameters whose numerical values must fall within a very narrow range of values. Darwin's basic argument that only the strong survive, and that evolution by natural selection is the only explanation for life on earth, can no longer stand because of this Anthropic Principal.

For quite some time now, atheist scientists have been wrestling with the apparent design of the universal constants found in physics.

¹⁸ Cosmic Codes by Chuck Missler published by Koinonia House, Cour d' Alene Idaho 83816-0347

Universal constants like the gravitational constant, the weight of protons, neutrons and electrons, the distance between electrons and neutrons, and the magnitude of the strong and weak nuclear forces are all exactly what they need to be for life to exist on planet Earth. On a larger scale, the position of the earth, the size and location of the moon, and even the stars in the milky-way all provide their own stabilising influence for life to exist on earth. If even a single variable were off, even slightly, or if any of these constants deviated by one part in a million, life on planet Earth would not be possible. For example, if the strong nuclear force changed by 0.0001% then six protons would not combine to make a stable carbon atom required for all carbon-based life. Protons are part of what makes up the Nucleus they are positively charged subatomic particles, the rest of the Nucleus is made up with neutrons that have no charge at all.

Both Protons and Neutrons together form the nucleus of an atom. Electrons orbit the nucleus of an atom in the same way earth orbits the sun. Now here is something that stumps the atheist scientist, Protons just happen to be 1,836 times larger than electrons and that is in every Atom. If they were a little bigger or a little smaller, Mankind would not exist, because atoms could not form the molecules required for life to exist. Why are protons 1,836 times larger than electrons, why not 10 times or 10,000 times larger or why not smaller? Why is it that every proton regardless of what material or Gas they make is always exactly 1,836 times larger than Electrons? How did protons finish up being just the right size for life to exist, was it luck or was it design? Keep in mind that luck is the lazy man's faith. Life on planet Earth exists on a knife-edge of universal constants upset one small part and we die. In Hebraic Gamatria $1+8+3+6=18=2\times 9$, nine is the number of finality, justice and judgement, and it has a strange relationship to six; six is the sum of its factors $3+3=6$ whereas $3\times 3=9$. Which identifies 1836 as the number of Man being God's summation of all His works; as long as man maintains that relationship even if we sin we will still be justified by seeking forgiveness, change that relationship and the end result is Judgement. While there is more to that number it is not relevant to this paper.

The extreme improbability that so many variables would align so perfectly in our favour by supporting life is not merely just by chance. It is this type of information at the sub-Atomic level that has led many scientists and philosophers to propose instead that it was God who providentially engineered the universe to suit our specific needs. This is the scientific part of the Anthropic Principle; it is undeniable evidence that the universe has been fine-tuned for our existence. However, does this Anthropic Principle apply only to physical science or is it more far reaching?

1 John 4:16

16 And we have known and believed the love that God hath to us. God is love; and he that dwelleth in love dwelleth in God and God in him.

When God began His Kingdom expansion programme He already knew exactly what He was going to do; everything He did was based on love and God's love is always rooted in Justice, Righteousness, Mercy and Discipline. Knowledge grew as the prophet Daniel said it would but that growth centred more on science than theology; the theologian had had the wind knocked out of his sails, and theology stagnated for a time. Now however, Christian theology not only has come from behind; it has overtaken physical science when dealing with the origins of this planet, so that neither the microscope nor the telescope holds any more fears, and the way printing has developed since the Guttenberg printing press is seen as a blessing.

Psalm 139: 13-15

13 For thou hast possessed my reins: thou hast covered me in my mother's womb. 14 I will praise thee; for I am fearfully and wonderfully made: marvellous are thy works; and that my soul knoweth right well. 15 My substance was not hid from thee, when I was made in secret, and curiously wrought in the lowest parts of the earth.

The Anthropic Principal was discovered over a period of about 50 years while "searching for interstellar communications." What was bad news for the scientist was good news for the theologian; the conference finally closed with the unsatisfactory conclusion that Planet Earth and its population remains a unique event in history, and is more of a miracle than statistical event.

Any intelligent being would have to have a method of instant communications with people here on Earth and this intelligence would have to communicate in the language of those who received the transmission.

For quite some time now, atheist scientists have been wrestling with the apparent design of the universal constants found in physics. This investigation into the Anthropic Principle continued and by the 1980s, physicist Paul Davies concluded that the physical evidence for the design of the universe, and the design of Earth for human life, could rightly be described as overwhelming. Today, no physicist or astronomer who has researched the question denies that our universe, the Milky Way galaxy, and the whole solar system possess compelling hallmarks of intentional design specifically for the existence of human life. Many researchers have commented over the past twenty years that it seems as if the universe "knew" mankind was coming. Another British mathematical physicist, Roger Penrose, was among the first to give voice to a philosophical conclusion: Namely that the extremely high level of fine-tuning astronomers and physicists have discovered, powerfully suggests the whole solar system has a purpose; therefore there must be a design/designer behind the universe. The design itself is so focused on providing a home for humanity that the design implies a significant part and possibly even the central part of the purpose for the universe is; that it has been specifically created for the express benefit of mankind.¹⁹

All Plants, Herbs, Trees, Animals, Birds, every creeping thing and even Man was created out of the Earth; Scientists have identified 92 elements that occur naturally in the Earth's crust. 99.15% of the mass of the human body is made up of six elements: oxygen, carbon, hydrogen, nitrogen, calcium, and phosphorus. The other 0.85% is composed of another clutch of elements like: potassium, sulphur, sodium, chlorine, magnesium, and gold. All are necessary for man to live. Chemically the DNA molecule itself is exactly the same across every living thing on the planet, but the composition of the organisms is different because the bases are in different orders allowing the construction of different proteins and enzymes. There are three billion Chemical letters in the Human Genome.²⁰ If it was written out, the Human Genome would stretch 5,592 miles, or 9,000 km. (+/- London to East China). It would take a typist working eight hours a day 50 years to type. It would fill one million pages; make 5,000 books stacked 200 feet high. If read out loud for 24 hours a day, it would take 100 years to complete. The human body has 100 trillion (100 000 000 000 000) cells, and each single cell contains a complete copy of the entire Genome. In the retina of the eye, there are about 6 million light-sensitive cone cells and another 100 million or so light-sensitive rods, and that is without the optic nerve, the cornea, and the lens.

According to the latest understanding, each chromosome contains hundreds to thousands of genes, which carry the instructions for making proteins. Each of the estimated 20-30,000 genes in the human genome makes an average of three proteins. It has taken scientists 13 years to decipher. The Human Genome Project involved hundreds of scientists from the UK, China, Germany, Japan and the USA making it an international effort; the UK was the largest contributor to the project, with one third sequenced at the Wellcome Trust's Sanger Institute, Cambridge. Even now 97% of the Human Genome is still not understood and the purpose remains mostly unknown. Carbon is the key component for all known life on Earth, its complex molecules are made up of carbon bonded with other elements, especially oxygen, hydrogen and nitrogen, and carbon is able to bond with all of these because of its four valence electrons. Carbon has 6 electrons, 6 protons, and 6 neutrons, (666), which is in fact a very interesting number.

The extreme improbability that so many variables would align so perfectly in our favour to support life on Earth is not just by chance, we are not just a blob of lucky mud. Not only has man been specially created but this Earth and in the whole solar system was specially prepared beforehand to be his home. This is the scientific part of the Anthropic Principle; it is undeniable evidence that the universe has been fine-tuned for our existence. However, does this Anthropic Principle apply only to the physical sciences or is it far more reaching than we realise?

Genesis 1:28

28 And God blessed them, and God said unto them, Be fruitful, and multiply, and replenish the earth, and subdue it: and have dominion over the fish of the sea, and over the fowl of the air, and over every living thing that moveth upon the earth.

Genesis 11:1

1 And the whole earth was of one language, and of one speech.

In this verse God talks to Adam for the first time, indicating that Adam already had a language and was fully conversant with it. Although Eve is not yet on the scene, God blesses *them* he then tells *them* to be fruitful; this word fruitful in Hebrew is *pä-rä'* it has a kind of double meaning, which is to bear children but also to raise spiritually minded children. (Keep this in mind). The word *pä-rä'* can also refer to fruit trees bearing fruit, it is a double entendre which is a word or expression that can be understood in two ways. In Matthew 7:16 Jesus using that double entendre says 'By their fruit you will know them'. He uses the analogy of fruit trees to refer to people and whatever seed they have in them will determine the kind of people they will be; there are only two Kingdoms 'The Kingdom of God and the kingdom of Satan'.²¹ Likewise there are only two kinds of seed, evil seed and the good seed, the good seed is the word of God²² therefore by analogy the evil seed is the word of Satan. There are also only two kinds of people those who acknowledge God and those who do not.

Further, when God blesses *them* it is not just Adam and Eve He blesses but the seed of Adam that carries the good seed, those who acknowledge the word of God. Next God tells *them* to multiply; the word multiply in Hebrew is *rabah* it means to become great, to become many, to become much, to enlarge, becoming numerous; all this growth refers to people, animals, and things. God is telling Adam to build up a large group of people who will be a God fearing community; this is what God's expansion and colonisation programme is all about.

The fact that God says be fruitful and multiply tells us that God is speaking to Adam in typical Hebrew poetic style; to be fruitful and multiply forms a parallelism. A parallelism is a common literary feature of Hebrew poetry throughout the Old Testament, a parallelism is when the same or a similar thought is repeated using different yet meaningfully related words or phrases.²³ This feature can be found in many poetic passages throughout the Old Testament and is more common in the Psalms and Proverbs. Recognising parallelism as a poetic feature can sometimes aid in understanding or interpreting a passage. For example, the use of a parallelism usually adds emphasis to the message in the larger passage to give a greater impact than individual words or single lines. Being fruitful means to spread the good news about God and His works; multiply means to increase in numbers, therefore to be fruitful and multiply means to build up a people who will follow God and be obedient to His word.

The next thing God tells Adam is to *mä-lä'* the earth, the translators have used the word '*Replenish*' but that would mean that the Earth had already been plished once, but it had not; the correct translation of *mä-lä'* is to plinish. The Hebrew word *mä-lä'* means to fill, to be full, fullness, abundance, to be accomplished, and to consecrate which is what Adam and Eve will have to do. Notice that word consecrate, it is talking about sanctification, about being made Holy, which in turn confirms the idea of fruitfulness implying raising spiritually minded children. From the next statement it would seem God is warning Adam of all the hard work that lies ahead, because after God said to plinish the Earth; God says and subdue it. That word subdue in Hebrew is *kabash* and it means to make subject too one's self, to subdue, to subdue with force, keep under, bring into bondage and make subservient, to violate and dominate by treading down. Much of that work will be through the tending the garden, like forestry, and husbandry; which includes agricultural farming, cultivation and production of edible crops for food for people and animals.

²¹ Matthew 12 : 26-28

²² Luke 8:11

²³ <http://www.crivoice.org/parallel.html>

Adam and Eve would need to understand about breeding animals, they would need to be able to apply thrifty management systems, and various conservation techniques, as well as the management of domestic affairs and family resources generally. Now having said all that this word *kabash* is not gentle in the way some things have to be subdued, and we must remember when God first puts Adam into the garden He tells him to tend and keep the garden; that word keep is *shamar* and it is all about guarding, about protection, to be constantly aware that there might be an enemy wanting to infiltrate the garden and cause damage. Having given Adam all these instructions God decides it is now time for Adam to have this helpmeet that He has been inferring for so long, so God gets Adam to name the animals. Why?

To produce God fearing children mankind needs the good seed which is the word of God. To produce good Godly offspring mankind would need to be able to read and write the word of God, so God would have to endow mankind first with language and then with writing skills that they may receive their spiritual daily bread for constant nutrition. God was about to bring Eve on the scene and so He tests Adam; by naming the animals he showing that he understands the importance of identity because names are as much a part of the Anthropic principal as sub-Atomic particles. By naming the animals it shows that Adam is ready to accept the responsibility of a married life and willing to be accountable for his actions.

Acts 26:14-15

14 And when we were all fallen to the earth, I heard a voice speaking unto me, and saying in the Hebrew tongue, Saul, Saul, why persecutest thou me? it is hard for thee to kick against the pricks. 15 And I said, who art thou, Lord? And he said, I am Jesus whom thou persecutest.

Hebrews 12:24-25

24 And to Jesus the mediator of the new covenant, and to the blood of sprinkling, that speaketh better things than that of Abel. 25 See that ye refuse not him that speaketh. For if they escaped not who refused him that spake on earth, much more shall not we escape, if we turn away from him that speaketh from heaven:

Language existed before the development of writing skills, yet writing alone is just one of the things that separate man from every other species. Writing allows the transfer of complex pieces of information between more than one person and depending on the materials used that information can be preserved for hundreds of years. Although God spoke to Adam in the garden and Adam named all the animals, nothing was written down at that time. The whole purpose of Adam naming the animals was to teach him to understand the purpose of names, because our name is meant to be what we are. Remember 'What' always allows quality to be added to something or someone, so Adam what are you? I am God's first Ambassador for the new colonisation of Earth, and from my offspring will at some future time come, those who form the Body of Christ.

Exodus 17:14

14 And the Lord said unto Moses, Write this for a memorial in a book, and rehearse it in the ears of Joshua: for I will utterly put out the remembrance of Amalek from under heaven.

And the Lord said unto Moses 'Write this for a memorial', this is the first time someone was told to write something down and Moses would have written it on a scroll. The first Hebrew writing would have been in the form of pictographs known as Palo - Hebrew or Proto - Sinaitic Hebrew, samples of this writing are also still found today. As both personal skills and writing instruments improved, so the style of writing changed. The ten writings given by God to Moses on Mount Sinai (the Ten Commandments) **Exodus 31:18** were also written by God in Hebrew and by the time of the book of Ezra, the square script style of Hebrew was in use.²⁴

FACT SHEET I

²⁴ <http://www.haaretz.com/jewish/.premium-1.53968>

תא

THIS WORD IS ONLY FOUND IN THE HEBREW SCRIPT IT IS NEVER TRANSLATED INTO ANY OTHER LANGUAGE. IT IS A DEMONSTRATIVE PRONOUN, IT IS BOTH THE OBJECT AND THE SUBJECT INDICATING GOD HIMSELF. THE PRONOUN STRONGLY DEMONSTRATES THE ENORMOUS POWER OF GOD. IT IS NOT OFTEN EXPRESSED IN ANCIENT HEBREW, AND IS TOTALLY UN-EXPRESSED IN ANY OTHER LANGUAGE OTHER THAN HEBREW.

: THIS THE ALEF THE FIRST LETTER IN THE HEBREW ALEFBET.

: THIS IS THE TAV THE LAST LETTER IN THE HEBREW ALEFBET.

THE ALEF/TAV IN THE OLD TESTAMENT IS THE SAME AS ALPHA & OMEGA IN THE NEW.

THE ALEF/TAV ALSO IMPLIES: - NEARNESS-WITH-BY-& AMONG.

GENESIS 1:1

7 6 5 4 3 2 1
הָאָרֶץ: וְאֵת הַשָּׁמַיִם אֵת אֱלֹהִים בְּרָא תִשְׂאֲרֶבֶת

THE AND THE

EARTH BY MYSELF HEAVENS ALEFTAU ELOHIYM CREATED FIRST AT

The Aleftau (Alphabet) is very important; it is the first thing God creates, and it is called the word of God. But, the word, ‘Word’ also refers to the Son, which is why John writes in the beginning was the word, and The word was God; The same was in the beginning with God. (Meaning the word of God is in God). Hebrews says God now speaks to us through His Son who upholds all things by the word of His power. This phrase is a double entendre, as well as referring to the aleftau, it also means the word of God is the power of God exercised through the word, His Son; it is and is a direct reference to the Aleftau in Genesis 1.

[Double Entendre Definition. A double entendre is a literary device that can be defined as a phrase or a figure of speech that might have multiple senses, interpretations or two different meanings or that could be understood in two different ways. Oxford Dictionary says that it “conveys an indelicate meaning”]

FACT SHEET 2

THE NAME	THE MEANING	STRONG'S NUMBER
ADAM	GOD'S AMBASSADOR	H 120
SETH	APPOINTED	H 8352
ENOSH	MORTAL MAN	H 583
KENNAN	FIXED DWELLING PLACE	H 7018
MAHALALEL	BLESSING/ PRAISE OF GOD	H 4111
JARED	DESCENT	H 3382
ENOCH	INITIATED DISCIPLINE THROUGH TEACHING	H 2585 H 2596
METHUSLAH	MAN OF DART/MISSILE/SPEAR	H 4968
LAMECH (The man with no name)	THIS NAME HAS NO MEANING	H 3929
NOAH	REST	H 5146

These are the names of the first ten patriarchs from Adam to Noah along with the meaning of their names. There is a message in these names, see below.

GOD'S AMBASSADOR (was) APPOINTED (to provide) MORTAL MAN (with a) FIXED DWELLING PLACE. THE PRAISE OF GOD CAME DOWN INITIATING DISCIPLINE (through) TEACHING. (Struck with a) SPEAR (and brought to) NOTHING, (he rose from the dead to provide a place of) REST.

Words in red are required for English grammar purposes.

Acts 2:8.

And how hear we every man in our own language, wherein we were born?

There are many things that separate human beings from the animal kingdom another one is the human mind, it has the ability to read, and use a language, which in turn provides the skill of writing. Languages have alphabets; letters are placed in a definite sequence forming the alphabet, like English or Hebrew. The purpose of language written or spoken is for communication, that communication conveys ideas from the simple to the complex but it can only do that because every letter has a design, a meaning and a value.

Hidden in God's genealogy is his plan of salvation and redemption foretold in the names of the first patriarchs; identifying the importance of names, and identity. No Jew ever wrote into the Torah what is known as the Christian's Gospel. Perhaps the three most famous patriarchs are Abraham, Isaac, and Jacob, but would they still be the chosen patriarchs of God if they were called **Yannis, Ittmar, and Macum**, it is very doubtful. But, that is not all, what about the secular world of science, sport, and politics to name only three fields of endeavour, after all Romans 8:28 says God uses everything for the good of His people.

The reason God gave Adam the responsibility of naming the animals was to impress upon him the importance of identity; our identity comes from God to identify our purpose and what we are meant to be. This allowed Adam to call his wife Eve, it allowed Eve to name her children, and everyone recognizes themselves by their name, and when that name comes from God it identifies the purpose of that individual's life, because we and the names we are given are part of 'The Anthropic Principal'.

Proverbs 25:2

It is the glory of God to conceal a thing; but the honour of kings is to search out a matter.

When the cosmos was established a large number of laws were put in place to hold it all together, not just to allow it to work; but as knowledge increased so mankind would discover those laws and use them to the benefit of all mankind, while recognising that they pointed to God Himself. Laws like gravity, or magnetism, laws that govern the flow of electricity, Laws explaining light and what it is, and many more besides. These Laws were there right from the start for man to discover, and by understanding these Laws and using them he could improve and enrich his living standards. What most scientists and many theologians miss is that part of God's Anthropic Principal that includes all the men and women who were destined to discover those laws. Those that have been discovered and those yet to be discovered will only be discovered at the right time and by the right people. A demonstration will prove this.

One of the terms used in electricity is 'Voltage', voltage is the pressure of electricity as it flows down the wire; the Law governing voltage was discovered by an Italian Physicist. His name is Count Alessandro Giuseppe Antonio Volta. (What a name) He discovered the first electric cell in 1800 at the age of 55. (A cell is a battery). Amps had not yet been discovered so the volts had to just kind of kick about on their own for a while. However, along came André-Marie Ampère, Ampere was a French physicist and science teacher who lived from 1775-1836 and is best known for defining a way to measure the flow of electricity, which was named after him, the 'ampere'.

The discovery of Ohm's law first appeared in the famous book called 'The Galvanic Circuit Investigated Mathematically', by German physicist Georg Simon Ohm in 1827, in which he gave his complete theory of electricity. Although he discovered one of the most fundamental laws that identified the fact that every conductor resists the flow of electricity, he was virtually ignored for most of his life by fellow scientists in his own country. Nevertheless, the name of Ohm will be forever immortalised because God chose him to discover this fundamental law. Do you think it would have worked if someone called John Tandy, David Voss and Oscar Clough would have been allowed to make these discoveries? Can you imagine a heater rated at 240 Tandies, and ten Vosses, with a resistance of 120 Cloughs? Would the names Tandy, Voss, and Clough sound just as right as Volts, Amps, and Ohms on an electrical device? I very much doubt it.

But we have missed one out, what about Watts that is the best one. A British inventor and engineer Thomas Savery took out the first patent on a steam engine in 1698, later he was joined by Thomas Newcome and together they designed and built the first practical steam engine by 1712. James watt radically improved the Savery-Newcome design and patented the change in 1769. William Hedley, Jonathon Foster, and Timothy Wright built the first steam locomotive to run on steel tracks in 1813. Then along came George Stephenson and John Thorswell, they designed and built the most famous of all locomotives in 1829, it was called the Rocket. Unless you are in the field of Steam Engines you will not recognise these names. The history of steam is long yet out of all these men who designed and built everything by hand only James Watt's name has been immortalised on every electrical motor, toaster, heaters, and a myriad of other electrical devices, why? Do you think Clive Blears would have worked as well, how would 850 blears sound on an electric motor?

Sir Winston Leonard Spencer-Churchill was a British politician and former Prime Minister of the United Kingdom from 1940 to 1945; he successfully took Britain through the last world war. If he had been called Cecil Throgmorton would he have achieved the same success or recognition, it is very doubtful.

A former policeman and an insurance clerk joined together to become the world famous ice skating duo Torvill and Dean. Would they have reached the same heights if they were called Maclusky and Winterbottom, probably not?

Isaiah 43:1-2

1 But now thus saith the Lord that created thee, O Jacob, and he that formed thee, O Israel, Fear not: for I have redeemed thee, I have called thee by thy name; thou art mine. 2 When thou passest through the waters, I will be with thee; and through the rivers, they shall not overflow thee: when thou walkest through the fire, thou shalt not be burned; neither shall the flame kindle upon thee.

It is not for nothing that God calls us by our names, though not everyone is intended to be an international figure, or a brilliant Engineer, remember there are always more sheep than shepherds. God calls us by our name because He not only wants us to know Him, He wants us to be known by Him; being known by God is critical. In the beginning was the word, that phrase encompasses God the father, God the Son and God the Holy Spirit, this is a central truth of Christianity and foundational to Christian theology. However, there are two sides to the relationship between God and Man. Over the years there has grown an imbalance of teaching and preaching the word of God, the emphasis has always been about knowing God. This has resulted in little or nothing being taught on the more important aspect of being known by God. God knows our ways, our days, and our thoughts, He knows the secrets of the heart and creates not only the fruit of our lips but the fruit of our thoughts and imaginations; as 1 John 3:20 puts it, God knows everything. in Genesis 18:19 God knows Abraham, in Exodus 33:12 God knows Moses, in 2 Sam 7:20 God knows David, in Jeremiah 1:5 God knows not only Jeremiah but also the Gentile nations, in Amos 3:1-3 God knows the nation Israel, in Hosea 11:12, and Hosea 13:5 God knows all the Saints and everyone else as well. In the New Testament, being known by God defines the Christian existence, Galatians 4:8-9 and 1 Corinthians 8:3, being know by God is the criterion of the last judgement, because in Matthew 7:23; 25:12 Jesus says to a group of people who knew Him, get from me you who work iniquity I never knew you; finally in 1 Corinthians 13:12 being know by God is a measure of eschatological glory, it says 'For now we see through a glass darkly; but then face to face: now I know in part; but then shall I know even as also I am known'.

All these names are part of the Anthropic Principal, like it or not it is God's law of human existence; our name is not only our identity, it is what we are. We are all very much a part of the cosmos, because everything works together for good to them that love God, to them who are the called according to His purpose, even if they do not know it. God has done His part, Adam and Eve have plenished the earth and colonised it, now it is up to us to continue to build the Kingdom of God.

John 1:1-5

1 In the beginning was the Word, and the Word was with God, and the Word was God. 2 The same was in the beginning with God. 3 All things were made by him; and without him was not any thing made that was made. 4 In him was life; and the life was the light of men. 5 And the light shineth in darkness; and the darkness comprehended it not.

Man's efforts to reach out into space to contact some intelligent extraterrestrial life form has been going on long before the UFO craze; he has been searching for a communication from outer space, from another form of intelligent life for a long, long time. What if such a communication was received, would it be seen as the greatest event this planet had ever seen, the discovery that there really is someone out there. Would such an event make a profound difference to how we think, how we act, how we live, would our behaviour change for the better; or just the opposite. Does mankind really want to contact a higher form of intelligence that would interfere with their lifestyle, or would they ignore such a communication and continue to seek other worlds they believe they can control with their own intelligence level? How would you feel if I told you that an extraterrestrial communication has been received by mankind and it was sent in stages to help us understand it and it started almost 6000 years ago? But, only now with mankind's technological advancement is man beginning to understand it.

We started off by talking about how every event is a part of God's invisible puzzle that led us to looking at the Kingdom of God; we discovered that when God created the cosmos He based it on a certain laws which man would eventually discover allowing him to improve his life style. Those laws are known as the Anthropic Principal. The Anthropic principle says that the universe appears to be designed for the sole purpose of human life; more than a century of astronomy and physics research has identified this unexpected observation.

The emergence of humans and human civilization requires specific physical constants, laws, and properties that fall within certain narrow ranges—and this truth applies not only to the cosmos as a whole but also to the galaxy, various planetary systems, and the actual planet we humans occupy, Earth. To state the Anthropic principle more dramatically, a preponderance of physical evidence points to the fact that humanity was not just expected but is the central theme of the cosmos. You see that extraterrestrial communication that man has received is ‘**The Bible**’.

These specific physical constants were discovered while searching for interstellar communications. The very first part of the Anthropic Principal was God speaking to Adam and giving him the Law of obedience. Language existed before the development of writing skills because in Genesis 1:28, God talks to Adam for the first time; indicating that Adam already had a language and was fully conversant with it. In Genesis 11: 1 the whole Godhead comes down and confounds the language of Mankind. Nevertheless this is the fore runner of the development of the 6500 languages common to man that are spoken today. Also from this seed came other specialist languages that Engineers, Doctors, Physicists, Lawyers and every other trade and profession use. The cosmos itself is a tumult full of a wild noisy confusion, as everything is bombarded by millions of conflicting electromagnetic waves and sound waves.

Psalm 148

1 Praise ye the Lord. Praise ye the Lord from the heavens: praise him in the heights. 2 Praise ye him, all his angels: praise ye him, all his hosts. 3 Praise ye him, sun and moon: praise him, all ye stars of light. 4 Praise him, ye heavens of heavens, and ye waters that be above the heavens. 5 Let them praise the name of the Lord: for he commanded, and they were created. 6 He hath also stablished them for ever and ever: he hath made a decree which shall not pass. 7 Praise the Lord from the earth, ye dragons, and all deeps: 8 Fire, and hail; snow, and vapours; stormy wind fulfilling his word: 9 Mountains, and all hills; fruitful trees, and all cedars; 10 Beasts, and all cattle; creeping things, and flying fowl: 11 Kings of the earth, and all people; princes, and all judges of the earth: 12 Both young men, and maidens; old men, and children: 13 Let them praise the name of the Lord: for his name alone is excellent; his glory is above the earth and heaven. 14 He also exalteth the horn of his people, the praise of all his saints; even of the children of Israel, a people near unto him. Praise ye the Lord.

When we begin to read this psalm and we read things like the Sun, the Moon, the waters, Fire, Mountains Trees and just about everything that God created including Mankind; are all instructed to praise God. Are statements like this rhetorical, or does God expect these things to actually Praise Him. If He does, does that mean that all these things can communicate; if they do, is it possible for man to listen to that praise? God has many different ways of communicating; He commands the weather, He speaks to the wind and waves of the sea. God also has many different ways of communicating with mankind, and He does that for a purpose, let me show you some of the ways God communicates with us: -

Jacob, Zechariah, Miriam, and Shepherds are contacted by angels — Genesis 32:22-32, Luke 1:13, 30, 2:10
Jacob, Joseph, A Baker, A Butler, Pharaoh, Isaiah, Joseph, the Magi are contacted in dreams -Gen. 28:10-22,
Belshazzar, God spoke to him through the writing on the wall — Dan. 5:5-9, (forcing an underwear change)
Balaam was contacted through a talking Donkey — Numb, 22:21-35

The Nation of Israel were contacted through a pillar of cloud/fire — Exod 13:21-22

Jonah was contacted through being swallowed by a fish — Jonah 2

Abraham, Moses, Jesus, and Paul were all spoken to verbally Gen. 12:1-4, Exod. 7:8,

Moses was contacted through a burning bush — Exod. 3:2

The People of the Kingdom of God are contacted through God’s Son The Word — Heb. 1:1-2

That is a whole lot of different ways that God communicates with man, and man has followed suite, they communicate with each other in many unusual ways, Whistling, smoke signals, singing and yodelling, drums and Art, and these are just a few. Animals communicate with each other as well as with humans, the dawn chorus is birds singing the praises of God, Cats Meow, the black beetle talks tapping out a form of Morse code, Honey Bees communicate by dancing, Hens cluck-talk to their Eggs and the chicks inside the Egg cluck-talk back, and what is more Eggs can faint! All these are somehow easy to accept but what about Psalm 148 and the Sun, Trees, and the Plants, can they communicate?

How about Rocks and precious stones like Diamonds, and since we are made from about 67% water does water communicate? Come with me on a little journey as we look at some strange communications.

FACT SHEET 2

Borderland Sciences says it has been investigating the relationship of the Sun and human behaviour for many years, and they are quite confident that they can predict behaviours based on sunspot fluctuations over very short and long durations within the Solar Cycle of 11 years. The most famous research had been done by **Professor A.L. Tchijevsky, a Russian scientist**, who presented a paper to the American Meteorological Society at Philadelphia in the late 19th century. He prepared a study of the history of mass human movement compared to the solar cycle. By these comparisons he constructed an **"Index of Mass Human Excitability"** covering each year **from 500 B.C. to 1922 A.D.** He investigated the histories of **72 countries** in that period, **noting signs of human unrest such as wars, revolutions, riots, expeditions and migrations,** plus the number of humans involved. **Tchijevsky found that fully 80% of the most significant events occurred during the years of maximum sunspot activity.**

He maintained that the "exciting" period may be explained by an acute change in the nervous and psychic character of humanity, which takes place at sunspot maxima. Tchijevsky's study is the foundation of sunspot theory on human behaviour, and as Harlan True Stetson, in his book *Sunspots and Their Effects*, stated, "Until, however, someone can arrive at a more convincing excitability quotient for mass movements than professor Tchijevsky appears to have done, scientists will be reluctant to subscribe to all the conclusions which he sets forth."

Tchijevsky findings shows that wars, world epidemics, and mass movement of people occur at peak of a Solar Cycle which happens every 11 years.

Sun Blasts Out 2016's Strongest Flare (Video)

[Tariq Malik, Space.com Managing Editor 26 July 2016](#)

The sun fired off its strongest solar flare of 2016 during an active weekend that saw three eruptions from the star's surface.

The uptick in solar activity occurred overnight on Friday and Saturday (July 22 and 23) when the sun unleashed three relatively moderate solar flares, all of which were captured on video by NASA's Solar Dynamics Observatory. While all three were somewhat minor, they are the first substantial solar events in months, NASA officials said in a statement.

TALKING TREES

FACT SHEET 3

Up in the northern Sierra Nevada, the ecologist Richard Karban is trying to learn an alien language. The sagebrush plants that dot these slopes speak to one another, using words no human knows. Karban, who teaches at the University of California, Davis, is listening in, and he's beginning to understand what they say. The evidence for plant communication is only a few decades old, but in that short time it has leapfrogged from electrifying discovery to decisive debunking to resurrection. Two studies published in 1983 demonstrated that willow trees, poplars and sugar maples can warn each other about insect attacks: Intact, undamaged trees near ones that are infested with hungry bugs begin pumping out bug-repelling chemicals to ward off attack. They somehow know what their neighbours are experiencing, and react to it. The mind-bending implication was that brainless trees could send, receive and interpret messages.

DO PLANTS COMMUNICATE?

Grover Cleveland Backster Jr. could always spot a liar. As he liked to tell it, he served in the Navy during World War II, but his interest in deception soon led him to the Army Counter-Intelligence Corps, where he specialized in hypno- and narco-interrogation. Then, in 1948, he joined the C.I.A., where, he claimed, he founded the agency's polygraph program. It was in the early morning hours of Feb. 2, 1966 when Backster, who had been up all night working in his office on West 46th Street, had just poured himself a cup of coffee when he noticed a houseplant,

'The Yellow Corn Plant', a very popular houseplant, its official Latin name is *Dracaena fragrans*. His secretary had bought it in to brighten the office. On a lark, Backster, who had a playful streak that belied his military background, decided to hook the plant up to his lie-detection machine. In human subjects, a polygraph measures three things: pulse, respiration rate and galvanic skin response, otherwise known as perspiration. If you're worried about being caught in a lie, your levels will spike or dip. Backster wanted to induce a similar anxiety in the plant, so he decided to set one of its leaves on fire. But before he could even get a match, the polygraph registered an intense reaction on the part of the *Dracaena*. To Backster, the implication was as indisputable as it was unbelievable. Not only had the plant demonstrated fear — it had also read his mind.

The Secrets Plants Keep:

Was Backster Right After All? Of course, as a result of his "studies," Backster was labelled a crackpot by the skeptic community for ever suggesting an organism with no central nervous system could have any level of awareness of this sort. This fundamental observation never kept polygraph expert Cleve Backster from delving into the secretive realm of plant consciousness, however.

Beginning in 1966, the CIA Interrogation Specialist had been conducting experiments with plants hooked to polygraph equipment, when he first noticed that in some instances the plants would “react” to various stimuli in ways that suggested some level of awareness pertaining to their environment.

Incredibly for the first time, scientists at Exeter University have now captured on film the process by which plants alert each other to possible dangers. When a plant is under attack, it releases a gas that warns neighbouring plants to protect themselves. It was already known that plants will secrete a quick-acting toxin to help ward off herbivores seeking to consume them. Now, scientists at Exeter University who made the new discovery have likened their observations to “listening in on a conversation.” Upon release of the “warning” gas by a plant that is under attack, other plants nearby begin to react in a way that shows they are preparing for an “attack,” after coming into contact with the gases released by the initial plant. Following this remarkable study, scientists are now wondering if there could literally be, “a chatter between plants all around us.”

FACT SHEET 4

CAN ROCKS COMMUNICATE?

JOURNAL OF GEOPHYSICAL RESEARCH

Electromagnetic Radiations from Rocks

Disaster Prevention Research Institute, Kyoto University, Japan

To test the possibility of the emission of electromagnetic waves from rocks, experiments have been made to measure the electric field by using mainly granite samples that were struck together or struck by a hammer or a weight and were fractured by a bending moment. The wide-band waveforms of electric signals were digitally recorded. Roughly four kinds of signals have been observed: 30 kHz, 5 kHz, 10 Hz and intermittent pulses. Using these measurements of the electric fields, the average electric dipole moment generated was estimated to be 10^{-2} Cm.

INTRODUCTION

It has recently been reported that the anomalous electro- magnetic waves were observed one hour to several hours before occurrences of large earthquakes. These electromagnetic waves are noticed as a precursor of the earthquakes and may be used for prediction of earthquakes. Gokhberg et al. [1979] observed abnormal electromagnetic noises, 55 min before the occurrence of the large earthquake (M7.4 on the Richter scale) in Iran at a place 9 km LCM from the epicentre. The noises continued until just before the occurrence of the earthquake, and the noise continued after the shock. Gokhberg et al. [1982] also observed similar earthquake associated anomalous electro- magnetic waves in Japan. The magnitudes of the earthquakes in this case were 7.5, 5.3, and 5.0 on the Richter scale.

This article is long and complex but it confirms that Rocks do communicate; they even warn us about earthquakes.

FACT SHEET 5

Simulated view of teleporting qubits between diamonds (Image: Hanson lab at TU Delft). [View gallery \(6 images\)](#)

DIAMONDS COMMUNICATE WITH EACH OTHER.

SCIENTIST'S TELEPORT QUANTUM INFORMATION ACROSS THE ROOM

Researchers working at TU Delft's Kavli Institute of Nanoscience in the Netherlands claim to have successfully transferred data via teleportation. By exploiting the quantum phenomenon known as particle entanglement, the team says it transferred information across a 3 m (10 ft) distance, without the information actually travelling through the intervening space. "Entanglement is arguably the strangest and most intriguing consequence of the laws of quantum mechanics," said the head of the research project, Professor Ronald Hanson. "When two particles become entangled, their identities merge: their collective state is precisely determined, but the individual identity of each of the particles has disappeared. The entangled particles behave as one, even when separated by a large distance." As electrons in an atom exist in orbits around a nucleus – like the way that the Earth spins on its axis – electrons also have "spin." When two electrons are entangled (that is, when they interact physically) and are then forcibly separated, the spin information on each becomes opposite to the other; they are essentially turned into mirror images.

However – and this is the bit that Einstein found "creepy" in his rejection of the entanglement theory – when one of the entangled electrons has its spin direction changed by some means, the other electron immediately reverses its own spin direction. The distance in the Kavli Institute tests was 3 m (10 ft) but, theoretically, this distance could have been hundreds of light years.

Quantum entanglement, one of the odder aspects of quantum theory, links the properties of particles even when they are separated by large distances. When a property of one of a pair of entangled particles is measured, the other "immediately" settles down into a state compatible with that measurement. So how fast is "immediately"? According to research by Prof. Juan Yin and colleagues at the University of Science and Technology of China in Shanghai, the lower limit to the speed associated with entanglement dynamics – or "spooky action at a distance" – is at least 10,000 times faster than light. This makes it possible to have instantaneous communication.

FACT SHEET 6

WATER

Have you ever wondered how much of your body is water? The percentage of water varies according to your age and gender. Here's a look at how much water is inside you.

Answer: The amount of water in the human body ranges from 50-75%. The average adult human body is 50-65% water, the male averaging around 57-60%, and the average adult woman is about 55%. The percentage of water in infants is much higher, typically around 75-78% water, dropping to 65% by one year of age.

Does water communicate and have a memory?

Every molecule that exists is interconnected in some way. This has been proven scientifically and you can see how powerful this is by looking at photos taken by Dr. Masaru Emoto. Dr. Emoto has been doing research for years experimenting with water molecules exposed to different sounds, music, words written on paper, prayer and even pictures. His results are astounding as you can see by the photos taken of water molecules after having been exposed to various types of music from classical to heavy metal, kind words to harsh mean words.

<https://keliadams.wordpress.com/2012/05/02/does-water-communicate-and-have-a-memory/>

Conscious Water Crystals. The Power of Prayer Made Visible

The image above shows a frozen crystal of pure water-- a bright, radiant hexagon. But in response to human thought and emotion, water crystals can take many forms. . .

The pictures and discussion in this article represent the brilliant work of Japan's Masaru Emoto. The photos have been published in a gorgeous book called *The Messages of Water* (see [Books](#)). If you still doubt that your thoughts impact the world around you, viewing Emoto's work will erase this doubt forever.

Emoto has been conducting worldwide research on the effect of ideas, words, and music upon the molecules of water, and the descriptions below are taken from the book of his published results.

formations.

The photo on the left is of a frozen water sample from the lake at Fujiwara Dam, in Japan. As you can see, the water's structure is dark and amorphous, with no crystalline

After the above water sample had been taken, the Reverend Kato Hoki, chief priest of the Jyuhouin Temple, made a one-hour prayer practice beside the dam. After that, new water samples were taken, frozen and photographed. As you can see (at right), the change is stunning--the ugly blob of the former sample has become a clear, bright-white hexagonal crystal-within-a-crystal.

At left, for comparison purposes, is a representative photograph of "untreated" distilled water. Different samples of distilled water showed different formations, but none were crystallized. Then this water was treated by taping words or people's names to the bottles, playing music to them, or exposing them to floral essences. One interesting result was that there was a language difference. For example, "Thank you" in English evoked different crystal formations than the same sentiment in Japanese. Here are some other effects that Emoto claims to have found in his research:

- Water from clear mountain springs and streams has beautifully formed crystalline structures, while the crystals of polluted or stagnant water are deformed and distorted.
- Distilled water exposed to classical music takes delicate, symmetrical crystalline shapes.
- When the words "thank you" were taped to a bottle of distilled water, the frozen crystals had a similar shape to the crystals formed by water that had been exposed to Bach's "Goldberg Variations" (see right) -- music composed out of gratitude to the man it was named for.
- When Elvis Presley's "Heartbreak Hotel" was played to water, the resulting frozen crystals were split in two.
- When water samples are bombarded with heavy metal music or labelled with negative words, or when negative thoughts and emotions are focused intentionally upon them, the water does not form crystals at all and displays chaotic, fragmented structures.
- When water is treated with aromatic floral oils, the water crystals tend to mimic the shape of the original flower. At right, water crystals were exposed to aromatic essence of chamomile.

Of great interest for healing and just day-to-day well being is the extreme effect upon water crystals of negative words and ideas. When the words "Adolf Hitler" were taped to a bottle of distilled water, the results seen at left were obtained. (Remember what we said about names being part of the Anthropic Principal.)

Sometimes, when we cannot see the immediate results of our prayers we think that we have not had any answer. But, as we learn through Masaru Emoto's amazing photographs, that thought of failure itself becomes represented in the physical objects that surround us. Now that we have seen this, perhaps we can begin to realise that even when immediate results are invisible to the unaided human eye, they are there. When we love our own bodies, they respond. When we send our love to the Earth, she responds.

For our own bodies at birth are 70 percent water, and the percentage of water in our bodies remains high throughout life (depending upon weight and body type). Also, the earth's surface is 70 percent water. And now we have seen before our eyes the proof that water is far from inanimate, but is actually alive and responsive to our every thought and emotion. Perhaps, having seen this, we can begin to really understand the awesome power that we possess, through choosing our thoughts and intentions; we can help to heal ourselves and the earth. If only we believe.²⁵ Japanese water responds to Japanese prayer because man was given boundaries by God.

²⁵ <http://www.spiritofmaat.com/archive/aug1/consciouswater.html>

THE SUN

We have seen that everything has some way of communicating with God; we have also see that if man takes the time to listen and learn everything that talks to God also speaks to man. The Sun warns us when unrest, rebellion, or war is likely to occur; the Sun also warns when epidemics are most likely to happen.

TREES AND PLANTS

Trees and plants communicate with each other, for protection, because God has given them a means of communication, they also communicate with man whose God given task is to tend and guard them. The Earth does not willingly allow food plants and fruit trees to grow while mankind misuses its increase to make extra money and leave many throughout the world to starve; the wicked are just using the Earth as a stage to present a display of wickedness to the world. Scripture says, *“The Kingdom of God is like a man who casts seed upon the soil; and he goes to bed at night and gets up by day, and the seed sprouts and grows, how, he himself does not know how it grows.”* ²⁶ The soil produces crops at God’s instruction; first the blade, then the head, then the mature grain in the head”. ²⁶ The corn and wheat and every other kind of plant be it for food or not is subject to God’s law for growing. As long as mankind do not fulfil their God given tasks plants will continue to suffer and they talk to us about it but we do not listen. We have already seen what happens when the plant pollinators suddenly die off, because man is not being the husbandman of his planet as he was told to be; Bees are dying, many butterflies have just gone and a large number of birds that pollinate plants have vanished. The trees and plants are warning us that they are not being pollinated we need to listen.

ROCKS

Can rocks talk? Throw a rock against a larger rock and it goes thump! Translation OUCH! God has Give Rocks the ability too talk to us and warn us when an earthquake is going to occur; animals listen to the rocks and quickly move away, we also need to listen to these warnings.

DIAMONDS

Diamonds are said to be a girl’s best friend, which is more true than we could ever imagine. Suppose that the girl was in fact the Bride of Christ, as each of us are part of one body with many members, and not all members have the same function, so in Christ we who are many are one body, and each member belongs to one another. Under the theory of entanglement, if two particles, say electrons, are created together, some of their attributes will become "entangled." If the two are then separated, doing something to one instantly affects the other. This would happen whether they were next to each other or across the universe. For instance, electrons act as if they have tiny bar magnets that point up or down, described by an attribute called "spin." If the two electrons are entangled through their spins — up or down — and a scientist measures the spin of one, the spin of the other will react even if one is on a lab table in Oxford and the other were on a planet near the star Antares, 1,000 light years away. Is this instant communication? (We will come back to this).

WATER

Jesus came for the specific purpose of providing an abundant life to all who would believe on Him, which is why Paul could say “My God shall supply all your needs according to his riches in glory in Christ Jesus.” We who have been justified by Christ now live by faith in His promise of future grace, if we believe it will be very hard for anxiety to survive. God’s “riches in glory” are inexhaustible. He really means for us not to worry about our future. Which is why at the Feast of the Tabernacles Jesus cries out, if any man thirst let him come unto me, and drink. He that believeth on me, as the scripture hath said, out of his belly shall flow rivers of living water. Unless or until we are filled with the Holy Spirit we will never see this land healed, we need to take note of the lessons the water trying to communicate to us. Psalm 148 is truly a wonderful Psalm.

This is the introduction to our teaching on the Kingdom of heaven, what I have spoken on here is almost never shared from the pulpit; I know I have never heard it taught. **AMEN**

²⁶ Mark 4:26-28
